CAREER OBJECTIVE:

A Full Stack Developer, with hands-on experience in solving real-world technical problems. I aim to contribute in an environment where knowledge is shared and ideas are valued. Seeking a challenging role to build scalable applications and contribute to a culture of innovation and continuous improvement.

SKILLS:

- **Programming Languages :** Java, SQL, JavaScript
- **Frameworks & Libraries :** Spring Boot, Spring, Hibernate, JSP, Servlet, JDBC, Swing
- **Web Technologies :** HTML, CSS
- **Tools :** Git, GitHub, Postman
- **Core Concepts:** DSA, Operating Systems, Computer Networking, DBMS

EDUCATIONAL QUALIFICATION:

B.Tech in Computer Science, Shri Vaishnav Vidhyapeeth Vishwavidayalaya, Indore
CGPA: 7.25 | Year of Passing: 2025

12th in PCM, Narmada Valley International School, Barwaha (CBSE)
Percentage: 82.6 | Year of Passing: 2021

10th, Narmada Valley International School, Barwaha (CBSE)
Percentage: 82.6 | Year of Passing: 2019

INTERNSHIP:

Software Engineer Intern   **February 2025 - Present**
Dhee Coding Lab   Yelahanka, Bangalore

- Contributing to developing scalable web applications using Spring Boot through RESTful API, Enhanced data access efficiency by fine-tuning Hibernate ORM mappings, reducing database load by caching and accelerating transaction throughput.
- Used Postman for testing the backend functionality using JSON format input and also contribute in HTML, CSS, and JavaScript, enhancing UI/UX responsiveness and user experience.

PROJECTS:

- **Placify - Placement Preparation Platform**   **December 2024**
  Tech Stack : JSP, Servlet, JDBC, MySQL, phpMyAdmin
  - Designed and deployed a dynamic, real-time web application with complete CRUD functionality for Students, Teachers, and Admin modules using Eclipse IDE and solved 35% bugs in modules.
  - Implemented interface like document sharing, automated ranking algorithms, secure authentication, and role-based authorization using sessions and cookies stored on phpMyAdmin database.
  - Delivered Features include interactive tests, performance analytics, announcement broadcasting, progress tracking, and robust placement preparation tools—driving collaboration across all modules.

- **EMS – Employee Management System**   **April 2025**
  Tech Stack : JSP, Spring MVC, Spring Boot, JPA, Postman, MySQL
  - Developed RESTful APIs with robust backend validation, leveraging Postman API for HTTP testing using JSON format and perform CURD operations.
  - Implemented ORM for entity mapping, reducing query time by 40% and enhancing caching efficiency.
  - Integrated secure JWT-based authentication/authorization. Enabled employees to access joining dates, hike, and salary details, all MySQL-backend for real-time data reliability.

- **Accounting System**   **July 2024**
  Tech Stack : Swing ,JDBC, MySQL, phpMyAdmin
  - Build GUI used for maintain inventory records and product availability for customers on commercial stores.
  - Store the customers data, show billing structure or price, gives discount, and reassign/adding the new quantity.

ACHIEVEMENTS:

- Solved over 200+ coding problems on standard platforms.
- National Player in Kabaddi and Football.
